

Town of Winchester

Culvert and Access Application and Permit

8522 Parkway Lane, Larsen WI 54947
920-836-2948

SLOPES TO BE
SEEDED OR SODDED

1. Culverts must be corrugated metal pipe or dual wall/smooth core HDPE pipe. Twelve (12) inches or more of cover is recommended when using HDPE pipe. If sufficient cover is not possible, metal pipe is required.
2. End walls are required for all culvert installations.
3. Culverts shall be a minimum of 18" diameter or a 15" x 21" arch unless special conditions warrant an alteration in diameter. Any reduction in diameter shall be subject to Plan Commission and/or Town Board review and approval.
4. Culverts shall be of sufficient length to accommodate the slope of the ground on each side of the driveway.
5. When the upstream and downstream culverts are larger than 18" in diameter, the diameter of the new culvert shall be the average of the two upstream and two downstream culverts.
6. All culverts shall be installed with the flow line of the culvert at the flow line of the stormwater management ditch.
7. Existing single lane driveways may use a minimum of a 22-foot culvert with end walls.

CONTACT DIGGERS HOTLINE AT 811 PRIOR TO STARTING CONSTRUCTION

Please refer to the Town of Winchester Chapter 19 Access Control / Driveway and Culvert Regulation Ordinance for a complete list of requirements.

PLEASE BE ADVISED: The Property Owner will be SPECIAL ASSESSED for the actual cost of repairing any damage that occurs to the Town's Public Infrastructure as a result of the installation of any culvert or construction of a new home in the Town of Winchester.
